Part 1 核心功能UI

AI for Skin, Smart for You

AI 赋能肌肤，智美为你而生

Sign Up & Start Your Smart Skin Journey

Part One

Registration method: email
Required authorization: Read and agree to the User Agreement and Privacy Policy

The image shows a mobile app login screen with a light orange background. At the top left is a back arrow. Below it is a square profile picture of a woman. The text 'Welcome Back' is centered, followed by 'Sign in to continue your skincare journey'. There are two input fields: 'Email Address' with an envelope icon and 'Password' with an eye icon and a toggle switch. Below the password field is a 'Remember me' checkbox and a security code '#FCCEB7 #F98C53'. A large orange 'LOGIN' button is centered. Below it is an 'OR' separator. Underneath is a 'Continue with Google' button with the Google logo. At the bottom, there is a link 'Don't have an account? Sign Up' and a 'Need Help?' link with an information icon. A dark moon icon is in the bottom right corner.

Login

Enter your registered email and password to quickly enjoy the AI smart skin management service

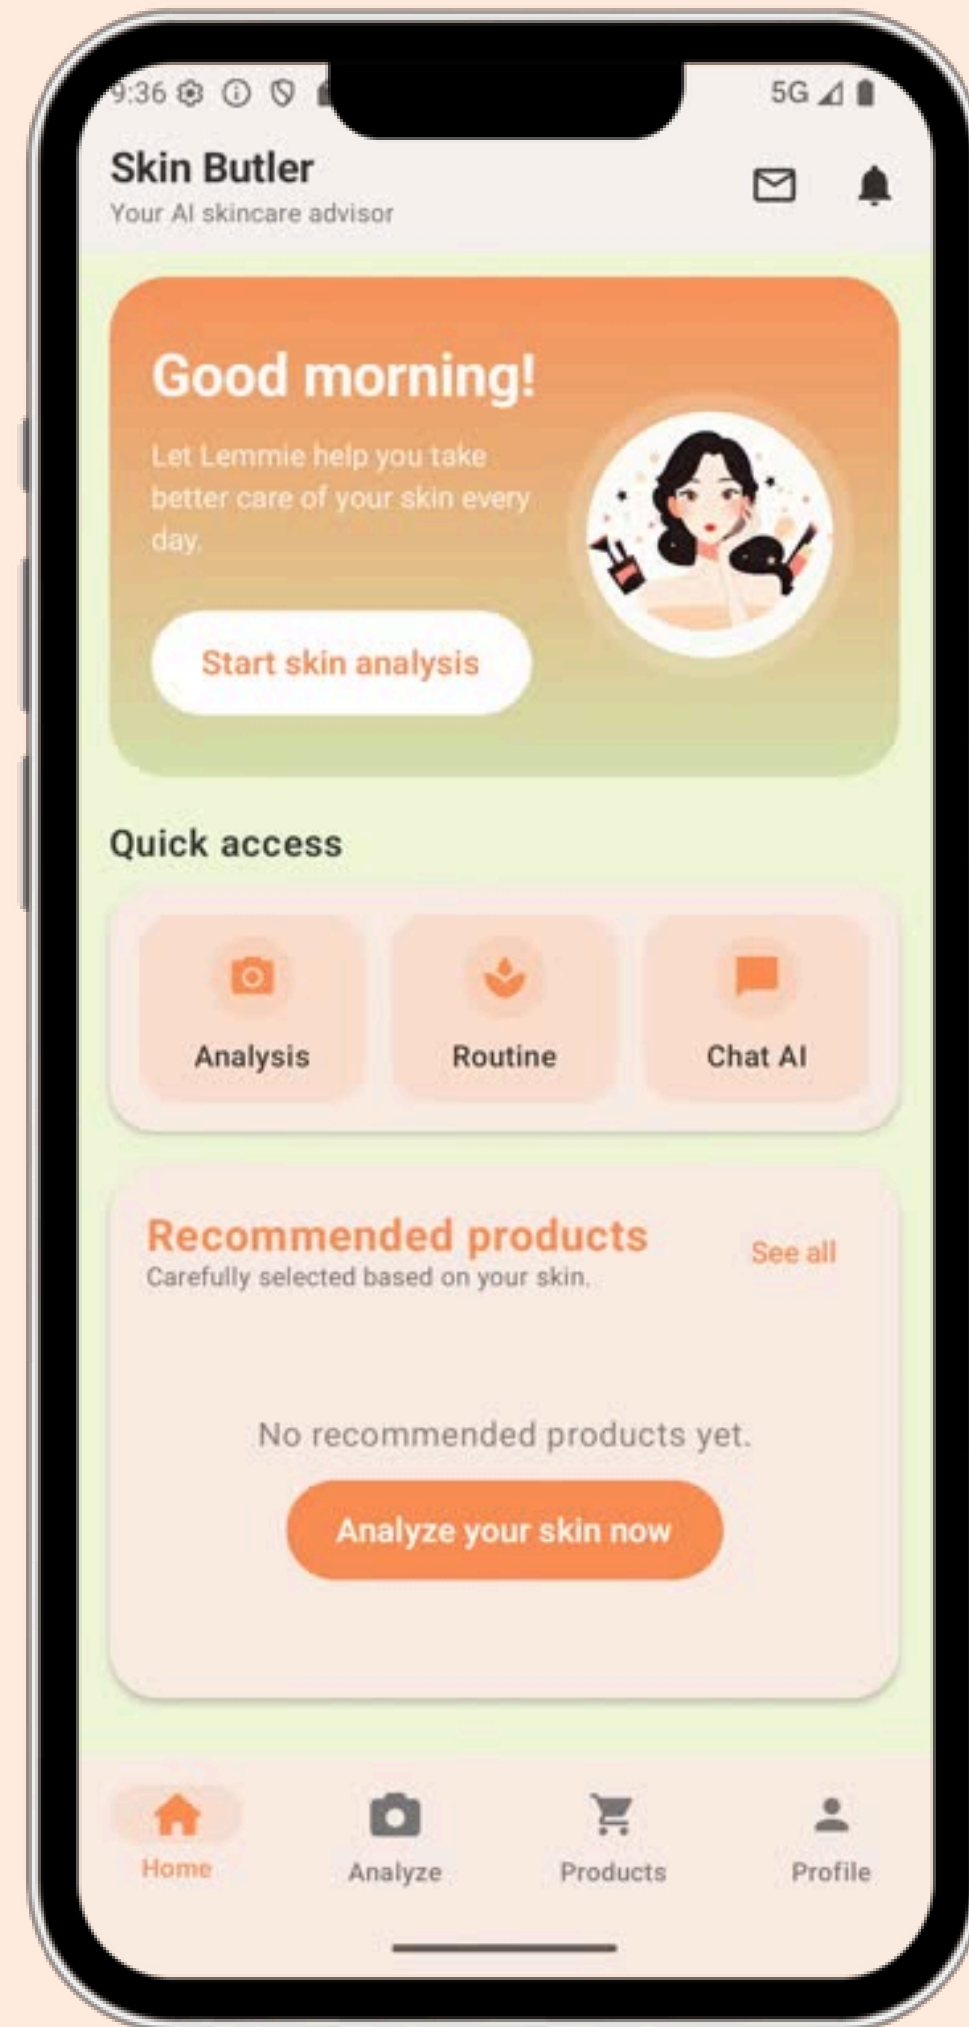

Login operation: Enter the registered email address + corresponding password.

Convenient options: Check "Remember login Status", no need to log in again within 30 days.

Auxiliary function: Forgot password? Click to retrieve and reset. Compliance Tip: Logging in indicates your agreement to the "User Agreement" and "Privacy Policy".

- Main button text: Log in Now
- Redirect: Not registered yet? Click to go to the registration page

Welcome to Skin Butler!

Three core quick access

Entry 1: View AI detection to accurately identify core skin issues.

Entry 2: Obtain AI-dynamically optimized morning and evening skin care plans that are suitable for skin types and seasonal changes, with clear and easy-to-understand steps.

Entry 3: Real-time answers to skin care questions, ingredient search, problem skin treatment, 24-hour dedicated AI assistant

Personalized product recommendation

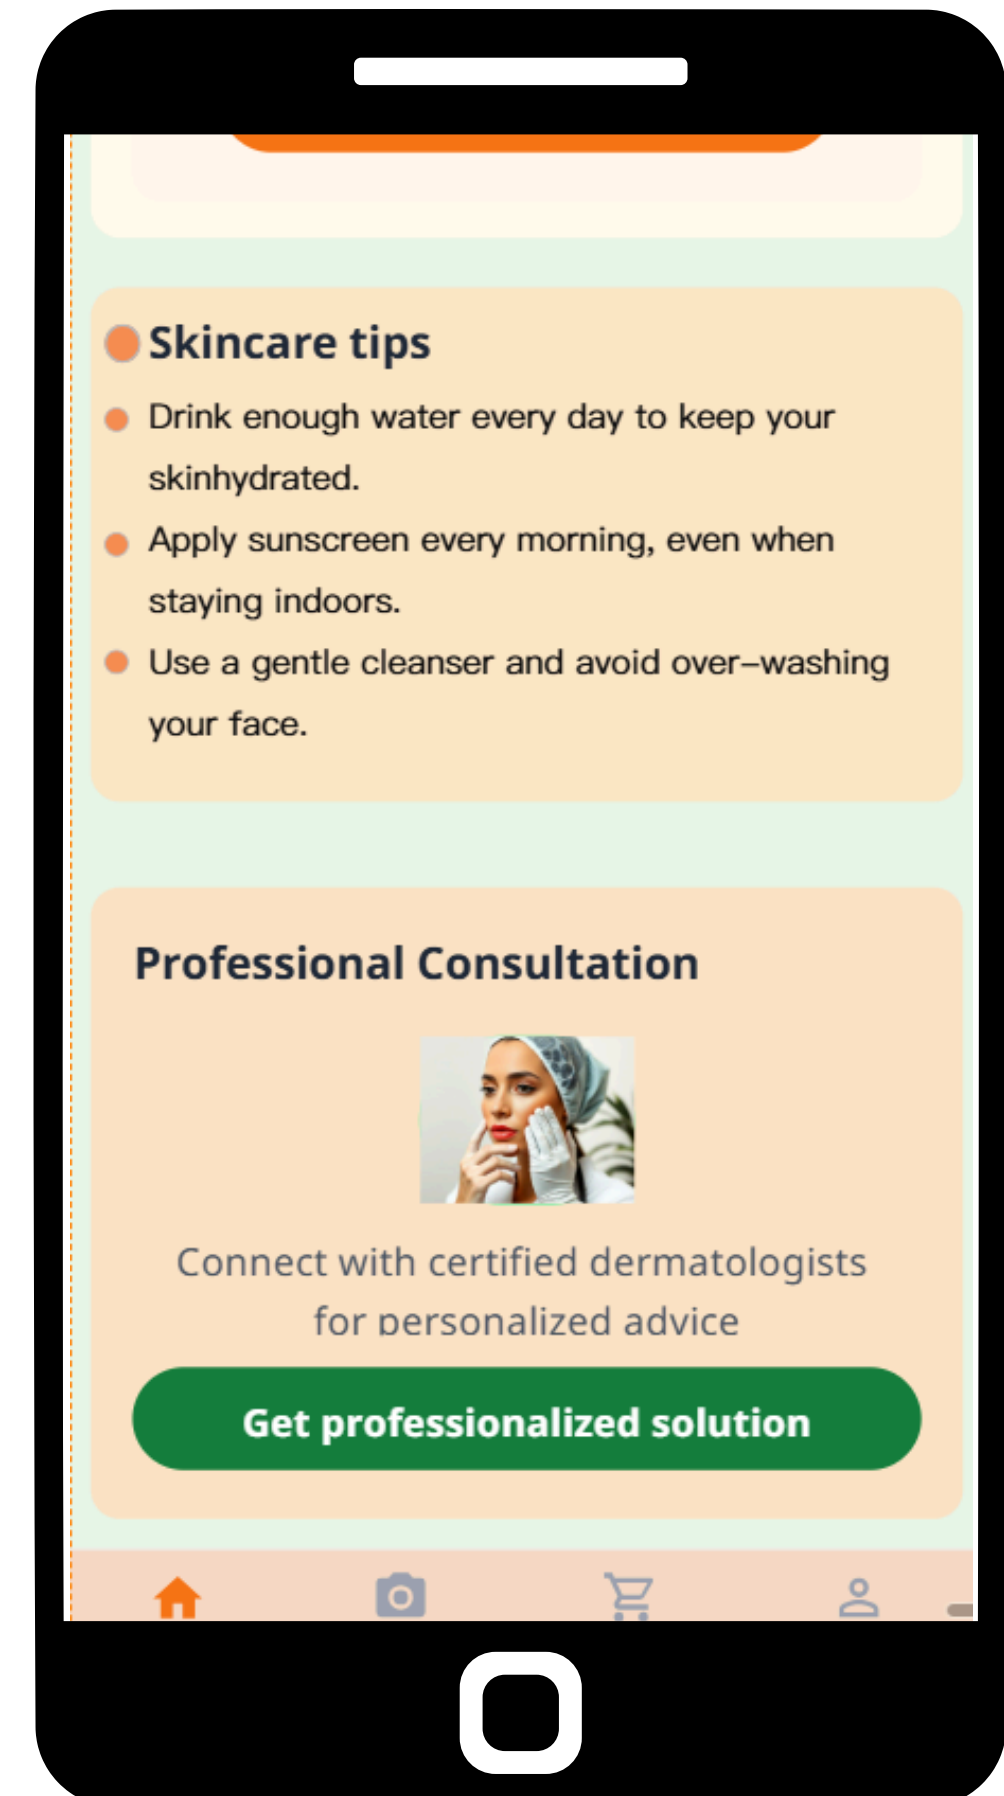

The system provides you with suitable repair or optimization products based on the generated skin reports

Skincare Advice Window

Dynamically adjust the plan based on skin type and environmental factors to avoid the risk of additive irritation from ingredients. It covers scenarios such as daily care, problem skin management, and seasonal adaptation. The steps are clear and easy to understand, and it is friendly to sensitive skin.

Online doctor consultation window

Certified dermatologists are available online 24 hours a day, supporting consultations with text, images or short videos. Covering common skin issues such as acne, allergies, and eczema, it offers a 15-minute rapid response and a privacy protection mechanism throughout the process.

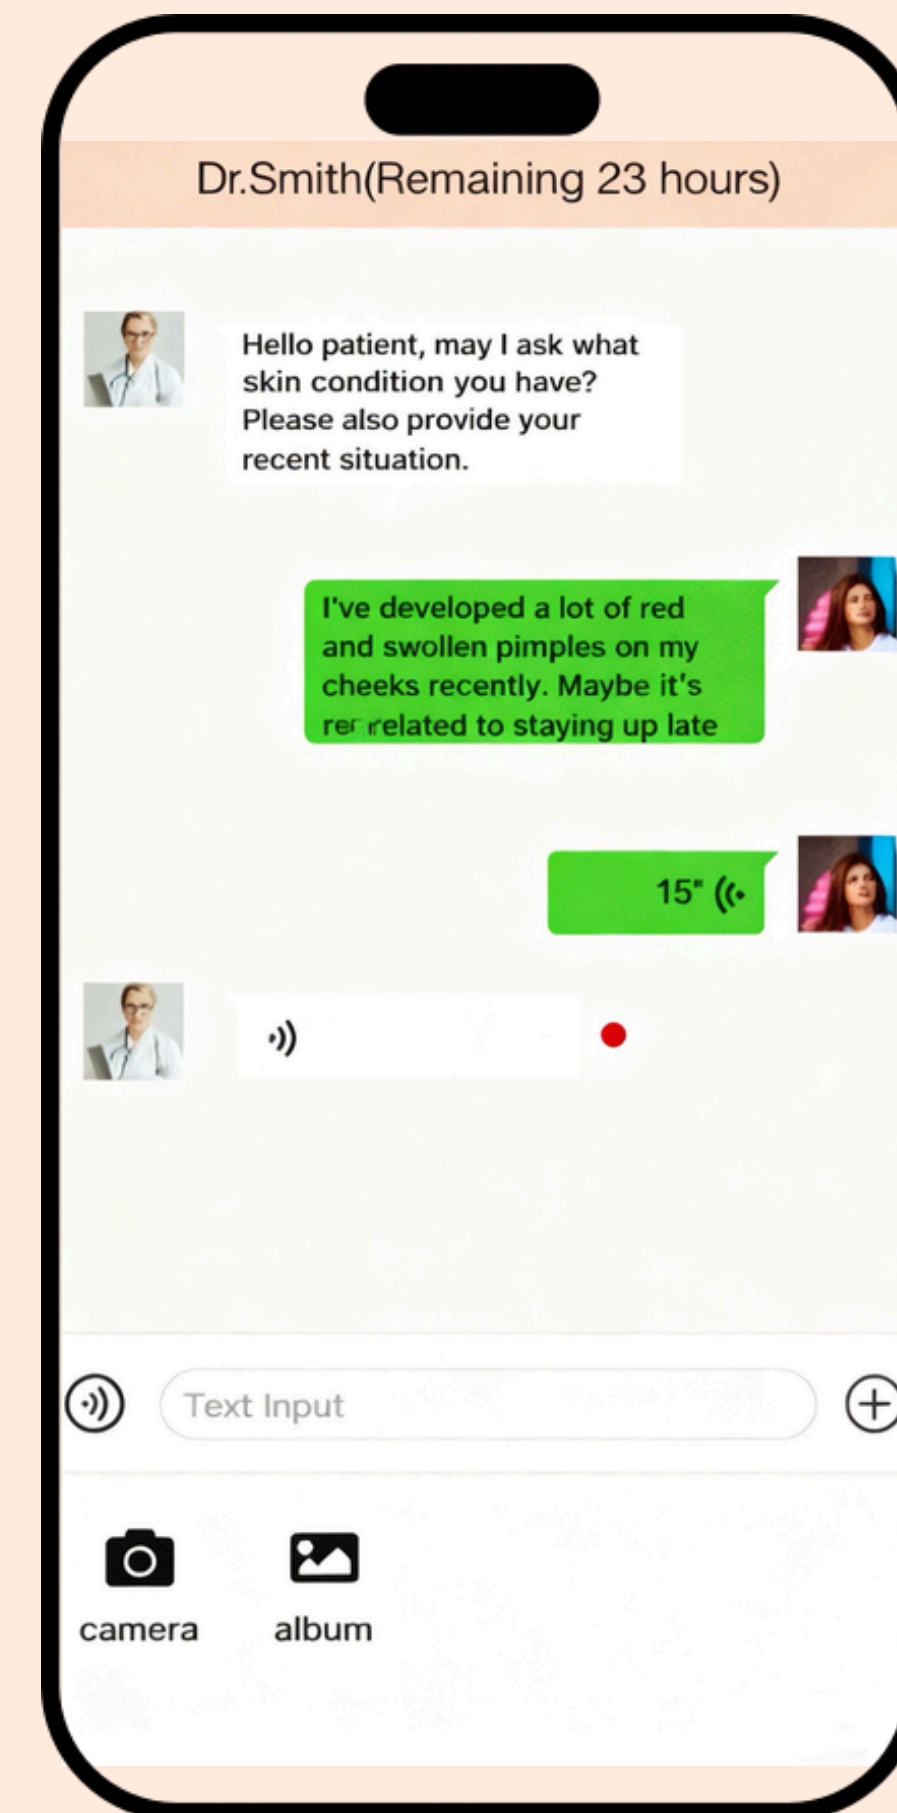

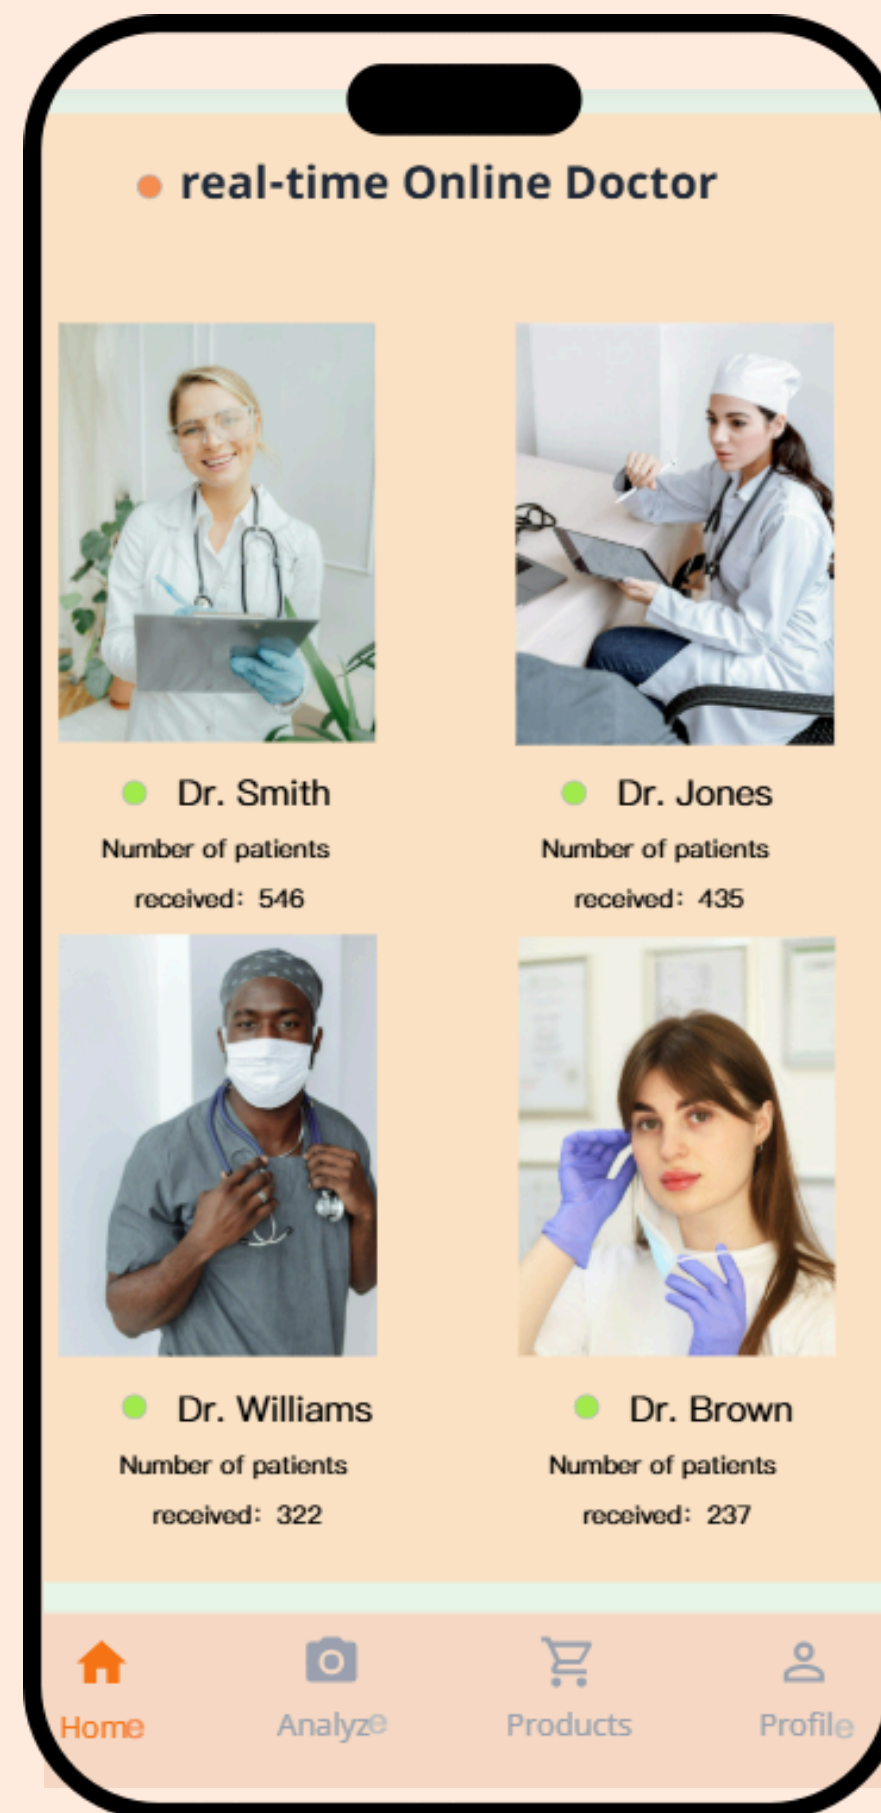

Doctor Selection

Multi-dimensional screening based on expertise (acne/sensitive skin/eczema, etc.), professional title, and patient scores, showcases the physician's professional qualifications, the number of patients treated, and real patient evaluations, and supports viewing past diagnosis and treatment cases.

Consultation

Supports both text and image as well as video consultation formats. Upload the AI skin report and symptom photos in advance. The doctor will respond within 15 minutes, providing diagnostic suggestions, medication guidance and adjustments to the skin care plan.

AI 赋能肌肤，智美为你而生

AI Skin Condition Recognition & Report

Based on a training model of millions of Asian skin cases, it accurately identifies 12 common skin problems such as acne, sensitive redness, eczema, and pigmentation, distinguishing primary symptoms from environmental triggering factors, with an identification accuracy rate of 92% (verified by clinical data). Supports uploading real-time taken photos or existing photos in the album, and quickly outputs recognition results within 3 seconds.

The report covers three major modules: "Analysis of Disease Types and Causes", "16 Core Skin Quality Indicators Data" (including moisture, oil, barrier health, etc.), and "Classification of Problem Severity". It uses dynamic comparison curves to present the changing trends of the skin and is accompanied by popular professional interpretations to avoid obscure terms.

AI 赋能肌肤，智美为你而生

AI Smart Shopping

From "View Details" on the shopping page to "Buy Now", a complete operation chain is formed, and at the same time, "ingredient safety" and "after-sales guarantee" are used to address purchase concerns.

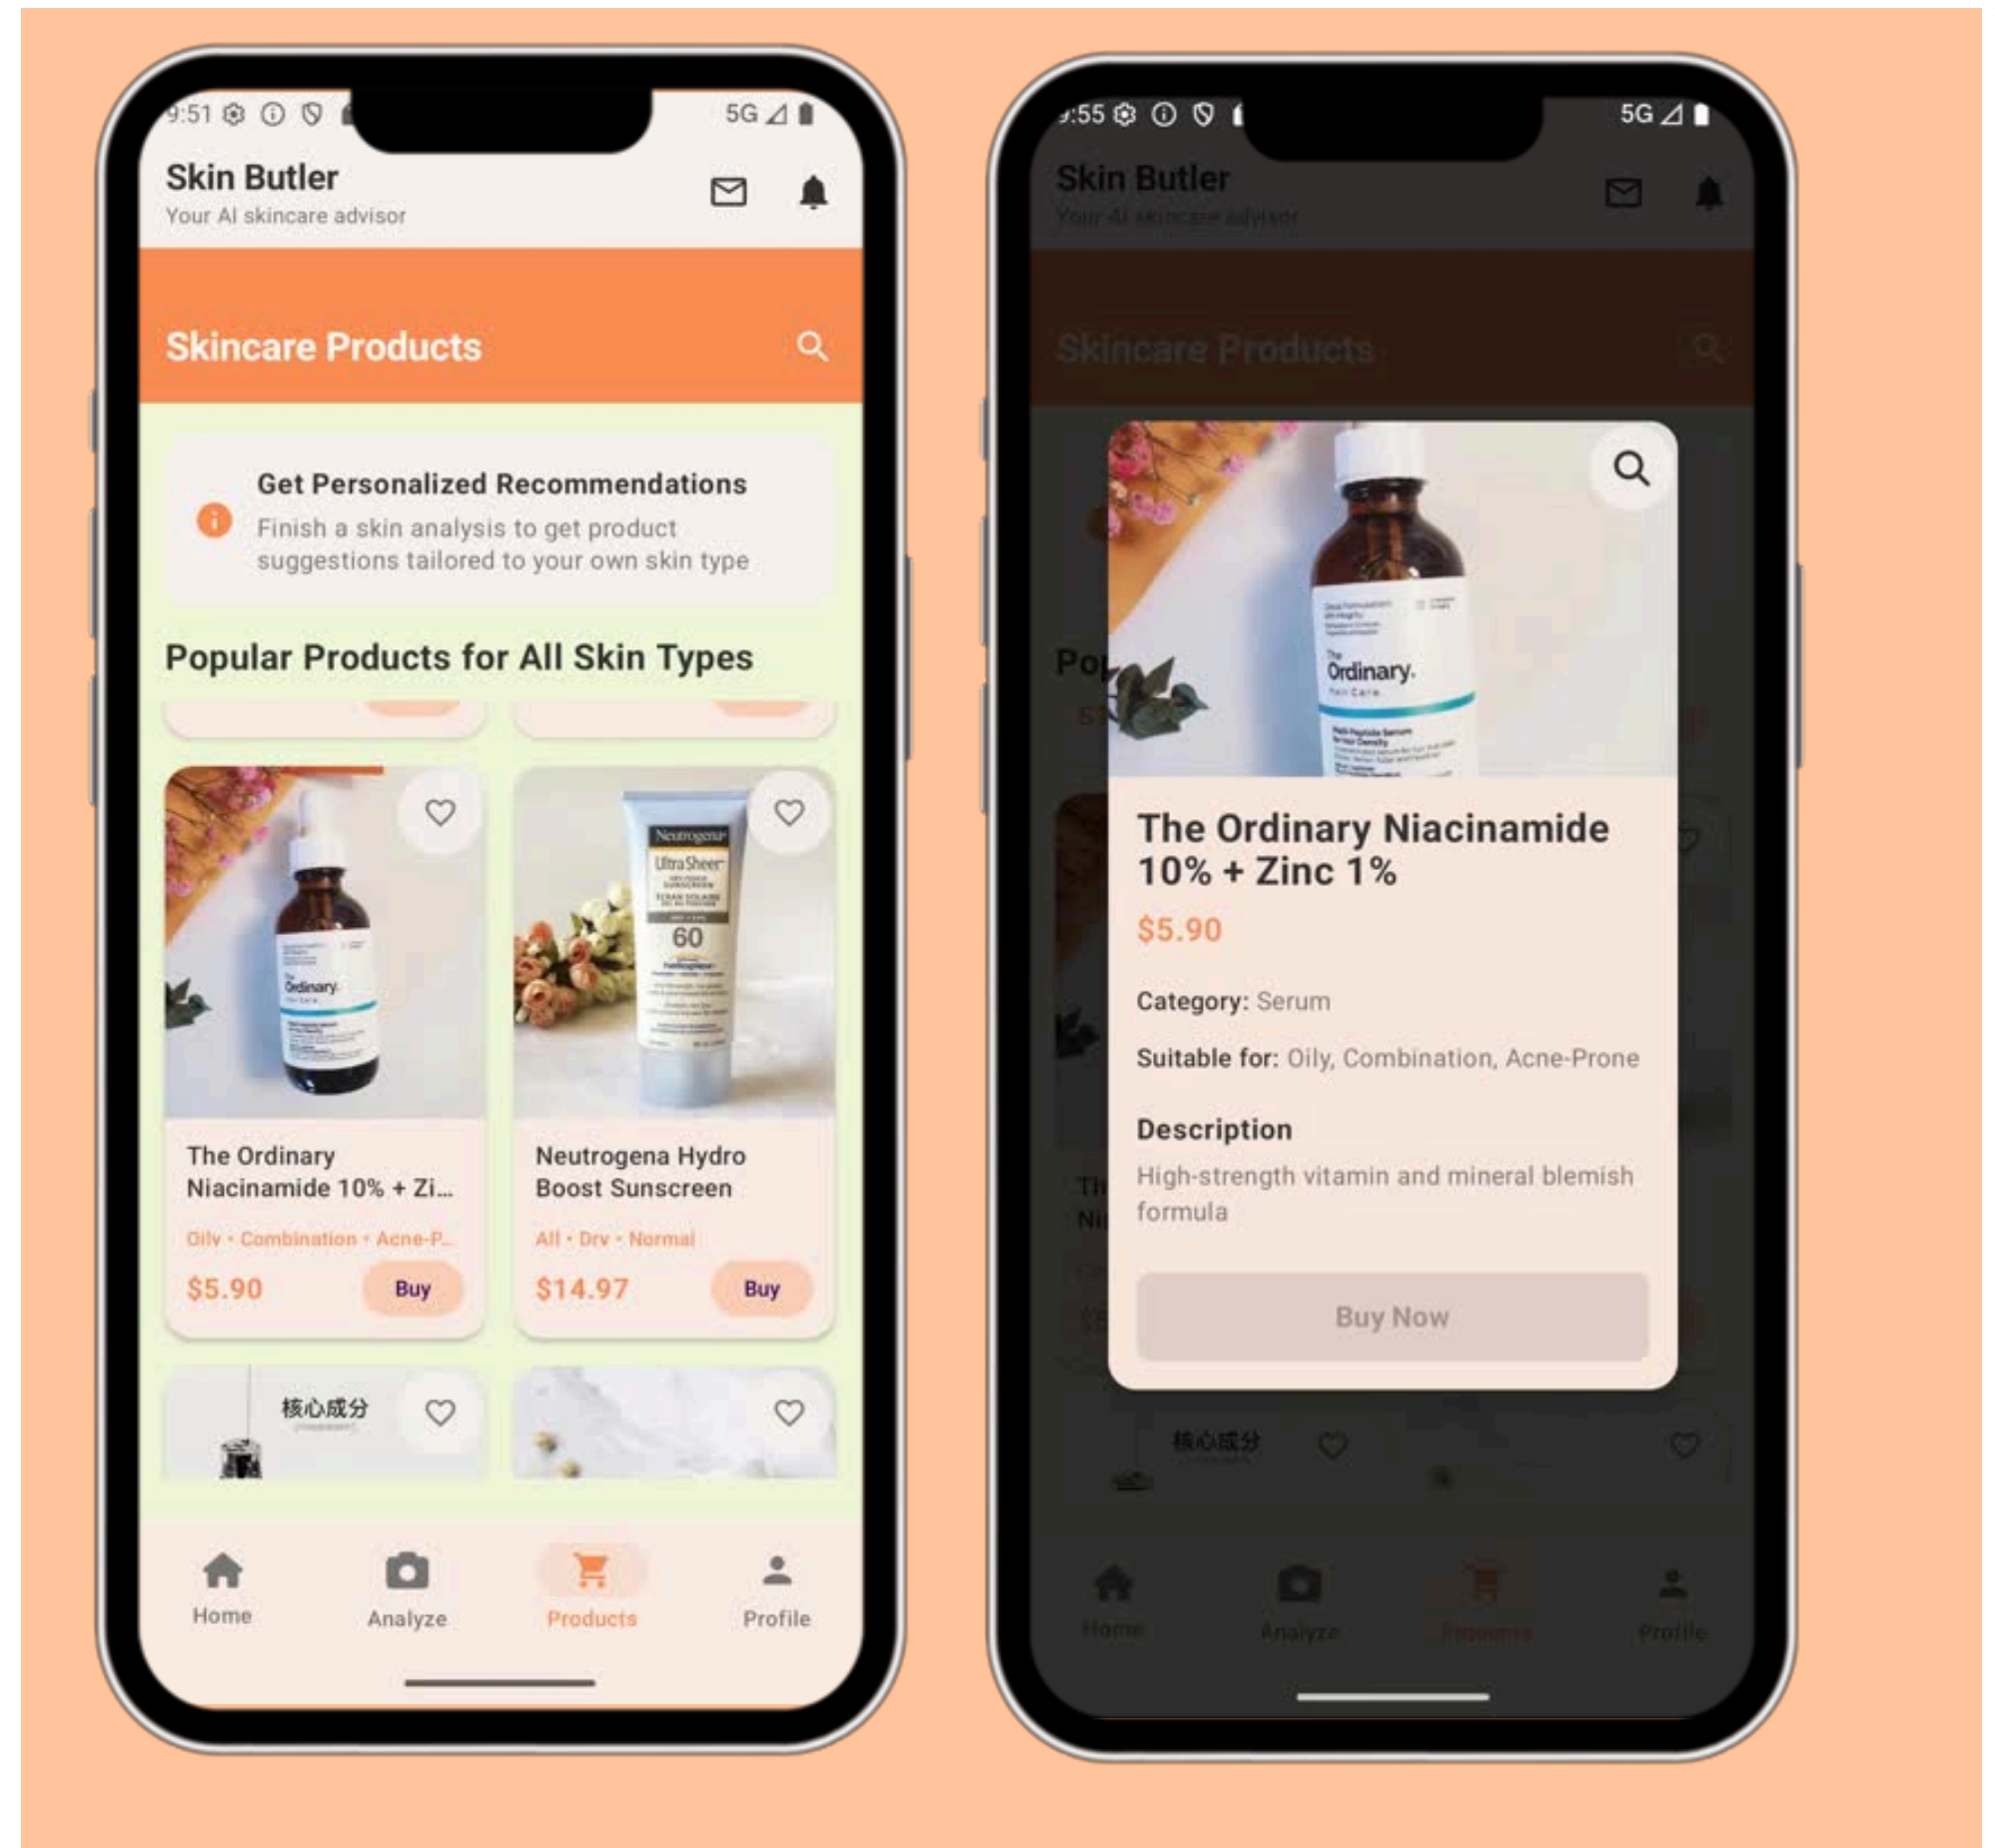

Product display area

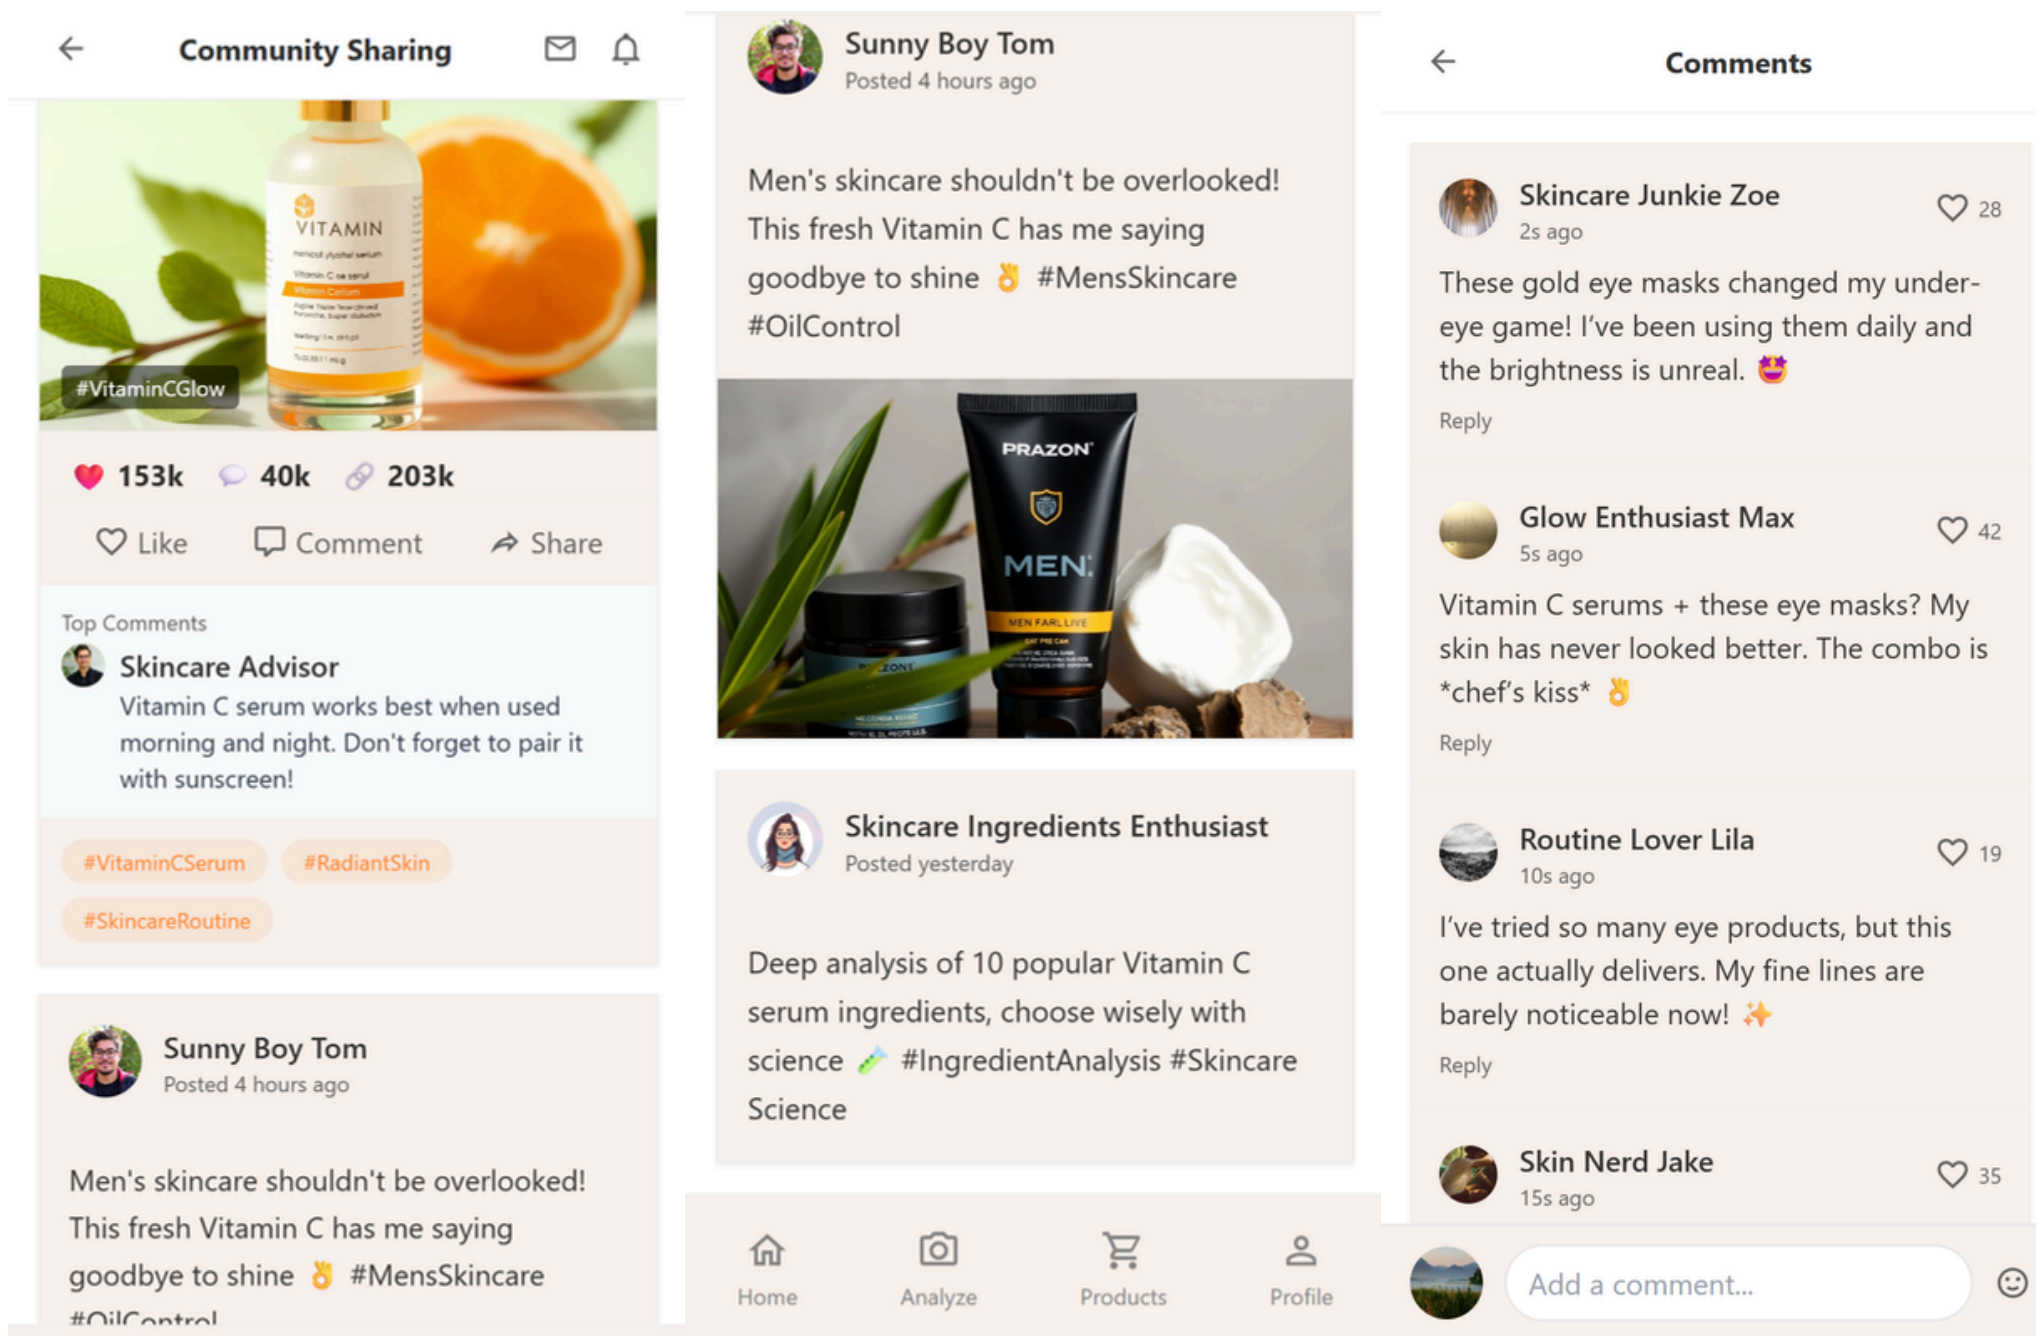

All products have passed the ingredient safety test. Click on the product to view the AI ingredient matching report.

Product Introduction Area

Place your order now to enjoy a personalized skin type matching plan. After placing your order, it will be synchronized to My Skincare Plan.

Community

Beauty community allows users to share skincare experience posts, recommend skincare products, and engage in discussions via comments, building a dynamic space for beauty lovers to exchange tips and discover new skincare finds.

Part 2 个性化设置

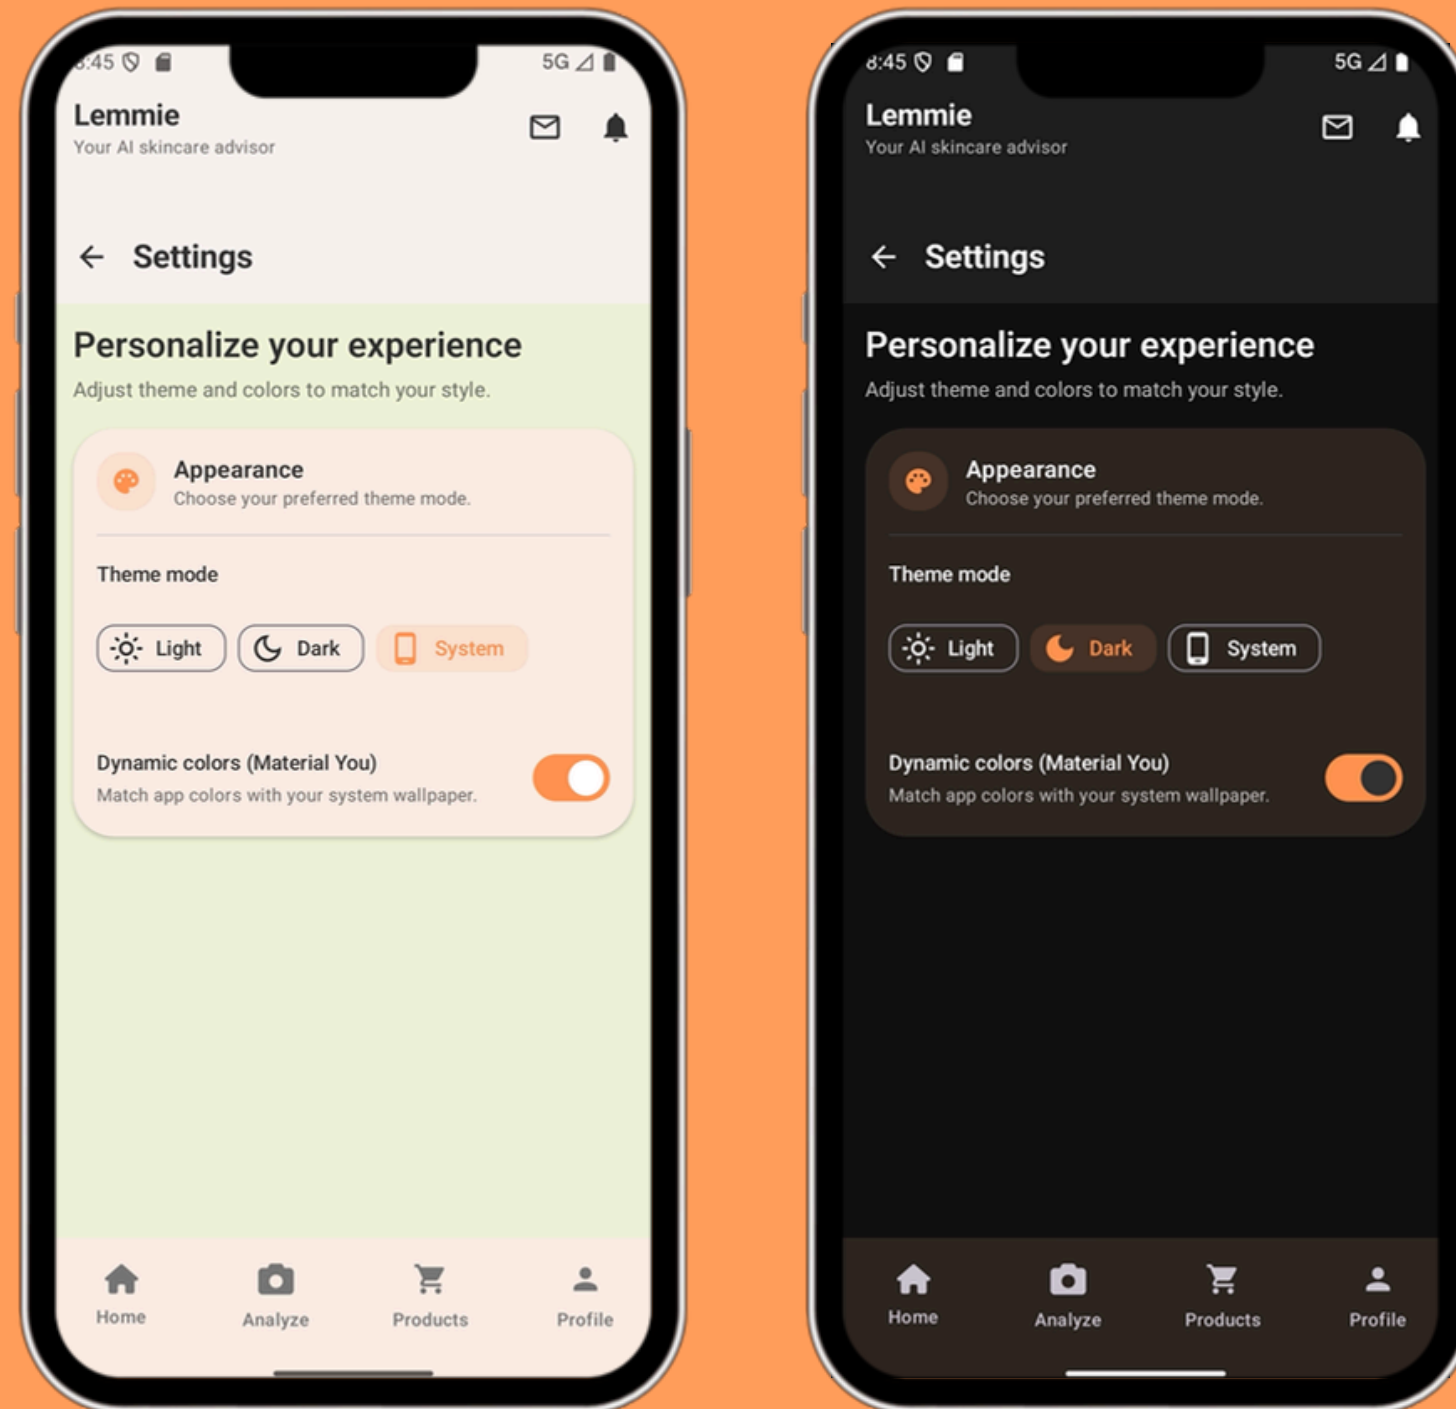

AI for Skin, Smart for You

- AI Precision Skin Diagnosis
- Personalized Beauty Solutions
- Cross-Scenario Smart Adaptation

Personalized Theme Settings

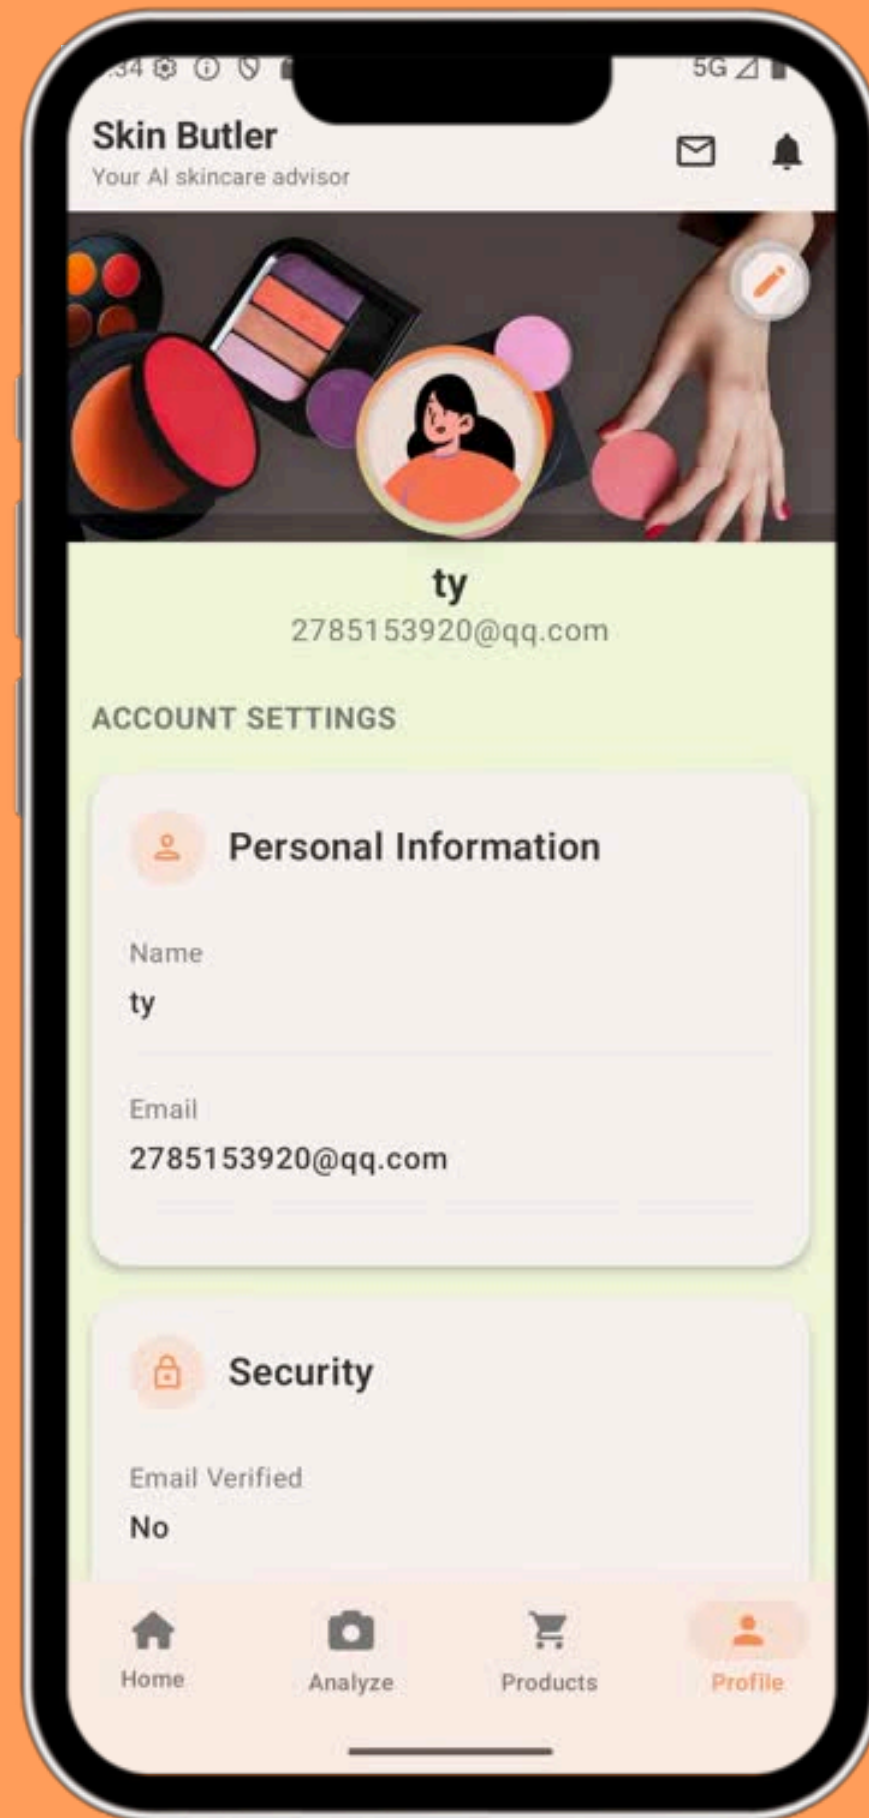

This settings section empowers users to personalize their app experience through theme mode selection (Light, Dark, or System) and dynamic color adaptation. Whether users prefer a bright layout, a dark-mode aesthetic, or a style that aligns with their device's system settings, it ensures the interface matches their taste, making every interaction with the skincare app feel personalized and comfortable.

Account Settings

This page enables users to manage their personal information (such as name and email) and account security settings (e.g., email verification status). It empowers users to personalize their account details, ensuring a tailored and secure experience within the skincare app.
